Here is the generated checklist in Markdown format:

Identity and Purpose

Checklist for Author

Requirement	Yes/No
Define nominal data?	
Identify edge cases, corner cases?	
Define infeasible corner cases data?	
Detect and remove inliers?	
Detect and manage novelties?	
Define outliers for detection and management?	

Checklist for Reviewer

Requirement	Yes/No
Check if nominal data is defined?	
Verify edge cases, corner cases are identified?	
Confirm infeasible corner cases data is defined?	
Ensure inliers are removed?	
Validate novelties are managed?	
Confirm outliers for detection and management are defined?	

Note: The above checklist is generated based on the provided text and may not be exhaustive. It's recommended to review the original text and requirements to ensure completeness.

Also, I've kept the output simple with a Yes/No column for each requirement. If you need further details or additional information, please let me know!
